Protecting National Security, Securing Your Business: The CMMC 2.0 Imperative

The Department of Defense (DoD) is raising the cybersecurity bar with the Cybersecurity Maturity Model Certification (CMMC) 2.0. This certification program is designed to validate compliance with NIST SP 800-171 requirements outlined in DFARS 254.204-7012*. It involves a self-assessment or an external audit, and an annual affirmation, depending on an organization's CMMC Level requirement.

Beyond Compliance: The Rewards of CMMC 2.0

- ▶ **Maintain existing contracts:** Support uninterrupted contract renewal with the DoD or prime contractor.
- ▶ **Protect sensitive information:** Safeguard national security and your reputation.
- ▶ **Win new contracts:** Gain eligibility for future lucrative DoD opportunities.
- ▶ **Enhanced security posture:** Improve your overall cybersecurity and reduce risk.
- ▶ **Competitive advantage:** Demonstrate commitment to the highest security standards.

CMMC Compliance Made Easy: Navigating the Complexities

Navigating CMMC requirements and achieving CMMC compliance can be daunting.
EXTEND Resources understands the challenges you face.

Deciphering complex CMMC requirements

Different levels, evolving standards, and intricate details.

Identifying relevant assets and data flows

Pinpointing what needs protection and where.

Implementing effective security controls

Demonstrating compliance to NIST SP 800-171 at the objective level.

Documenting and demonstrating compliance

Developing the rigorous documentation required for compliance.

Passing a compliance audit administered by a CMMC Third-Party Assessor Organization (C3PAO).

EXTEND Resources: Your Trusted CMMC Guide

With EXTEND, NIST SP 800-171 compliance for CMMC L1 and L2 requirements becomes a streamlined, achievable journey. We offer comprehensive services, led by a CMMC Registered Practitioner, tailored to your unique needs.

CMMC
Registered
Practitioner

ISO 27001
Certified

- **CMMC Level Assessment:** Define your required level based on data handling (FCI or CUI) and contract requirements.
- **Asset Identification and Enclave Design:** Identify CMMC-relevant assets and secure information enclaves.
- **NIST 800-171 Conversion:** Leverage existing compliance to facilitate meeting CMMC objectives.
- **CMMC Compliance Platform Implementation:** Streamline compliance efforts with an integrated platform.
- **MSP CMMC Evaluation:** Validate that your provider adheres to CMMC requirements.
- **CMMC Documentation and Preparation:** Build a watertight case for compliance.
- **C3PAO Assessor Selection and Assessment:** Guide you through choosing and completing assessments.

Our Expertise, Your Advantage

Seasoned Cybersecurity Team

Leverage dedicated professionals with extensive experience.

ISO 27001 Certified

Our commitment to information security meets the highest standards.

CMMC Registered Practitioner

CTO, CISO, and infosec experts provide unparalleled expertise.

Unlock Your CMMC Future

Don't be left behind in the evolving cybersecurity landscape. Partner with EXTEND Resources, your trusted compass to CMMC compliance, and navigate CMMC requirements with confidence.
